Figure and Table Captions

Figure S1. H$_2$ evolved rate of GCN-CLA with loading the different amount of Pt.

Figure S2. Photocatalytic H$_2$ evolved performance of GCN-CLA by loading with 3 wt% of Pt, Au and Ag.

Figure S3. Particle size distribution curves of GCN-B and GCN-CLA samples.

Figure S4. Pore size distribution plots of as-made GCN-B and GCN-CLA samples.

Figure S5. FT-IR spectra of as-prepared GCN-B, GCN-0, and GCN-1 samples.

Figure S6. Survey XPS spectra of as-fabricated GCN-B and GCN-CLA samples.

Figure S7. EIS spectra of as-synthesized GCN-0, GCN-1, and GCN-CLA samples.

Figure S8. VB-XPS spectra of GCN-B and GCN-CLA samples.

Figure S9. H$_2$ evolved rate over as-synthesized samples under full arc irradiation.

Figure S10. H$_2$ evolved rate of GCN-CLA using different amount of catalyst.

Figure S11. H$_2$ evolved rate of GCN-CLA using lactic acid, triethanolamine, methanol and ethanol as sacrificial agents.

Figure S12. H$_2$ evolved activity of GCN-CLA reaction at different temperature.

Figure S13. H$_2$ evolved activity of GCN-CLA via in-situ and pre-loading 3 wt% Pt.

Figure S14. H$_2$ evolved rate of various GCN samples vs the amount of N element.

Table S1. The C and N elements amount of GCN-B, GCN-0, GCN-1 and GCN-CLA from XPS analysis.
**Figure S1.** \( \text{H}_2 \) evolved rate of GCN-CLA with loading the different amount of Pt.
