Understanding segregation processes in SAMs formed by mixtures of hydroxylated and non-hydroxylated fatty acids

Otto V.M. Bueno, J. J. Benítez and Miguel A. San-Miguel

ELECTRONIC SUPPLEMENTARY INFORMATION

Figure S1. Top views of initial configurations in a rectangular network of 25:75 (A, B, C and D) and 75:25 (E, F, G and H) ALE:PAL compositions. Segregated systems are set up in column (C and G) and island (D and H).
Figure S2. Tilt-angle distribution for pure ALE system of the inclination angle formed by vectors $\epsilon_1$ and Z axis.
Figure S3. The tilt-angle distribution for pure PAL system.
**Figure S4.** Top views of final configurations of the 75:25 and 25:75 ALE:PAL mixed systems.
Figure S5. Rotated side views of final configurations of the 75:25 and 25:75 ALE:PAL mixed systems.
