Supplementary materials

Flexible and Stretchable Dual Modes Nanogenerator for Rehabilitation Monitoring and Information Interaction

Fig S1. The fabrication process of the FSDM-NG.

Fig S2. The schematic diagram for $d_{31}$ mode of piezoelectric nanogenerator

Fig S3. The SEM images for the surface and cross-section of PVDF layer with or without Ag electrode.

Fig S4. Fourier transform infrared spectra of the PVDF layer.

Fig S5. $Q_{sc}$ of the FSDM-NG under different loading frequencies from 1 Hz to 2.5 Hz.

Table S1. Comparing the current density between the device and previously reported piezoelectric polymer-based nanogenerator.

Fig S6. Durability test of the device.

Fig S7. Characterization of output performance of the device with load resistances.

Fig S8. Output performance of the FDDM-NG under water.

Fig S9. The word “HELLO” encoded by the voltage signal from the FSDM-NG.
Fig S1. The fabrication process of the FSDM-NG.
Fig S2. The schematic diagram for $d_{31}$ mode of piezoelectric nanogenerator.
Fig S3. The SEM images for the surface and cross-section of PVDF layer with or without Ag electrode.
Fig S4. Fourier transform infrared spectra of the PVDF layer.
Fig S5. $Q_s$ of the FSDM-NG under different loading frequencies from 1 Hz to 2.5 Hz.
Table S1. Comparing the current density between the device and previously reported piezoelectric polymer-based nanogenerator.
