

Supporting Information

Pyrovanadate-templated Silver(I)-ethynide Cluster Circumscribed by Macrocyclic Polyoxovanadate(V)

Yun-Peng Xie and Thomas C. W. Mak*

Department of Chemistry and Center of Novel Functional Molecules, The Chinese University of Hong Kong, Shatin, New Territories, Hong Kong SAR, People's Republic of China

1. Experimental details

Materials and Methods

All chemicals were commercially purchased and used as supplied. Elemental analyses for C, H and N were performed with a Perkin-Elmer 2400 CHN elemental analyzer. IR spectra were recorded in the range 400–4000 cm⁻¹ on a Nicolet Impact 420 FTIR spectrometer with pressed KBr pellets. The morphology of the samples was studied by transmission electron microscopy (TEM) using a Hitachi model H-800 transmission electron microscope at an accelerating voltage of 200 kV. Electrochemical Experiments. The electrochemical properties were investigated with a Potentiostat/Galvanostat Model 263A instrument (Princeton Applied Research) driven by a PC with proprietary software. A conventional three-electrode system was used. The concentrations of **1**, (Et₄N)VO₃ and AgBF₄ in the measurement of cyclic voltammetric behavior were in DMF. The solutions were de-aerated thoroughly for at least 20 min. with pure nitrogen before experimental measurement.

X-ray Crystallography

Crystal data were collected on a Bruker Smart Apex II CCD diffractometer with Mo-K α radiation ($\lambda = 0.71073 \text{ \AA}$). The structures were solved by direct methods with SHELXS-97^[1] and refined by full-matrix least-squares techniques using the SHELXL-97 program^[2] within WINGX.^[2]

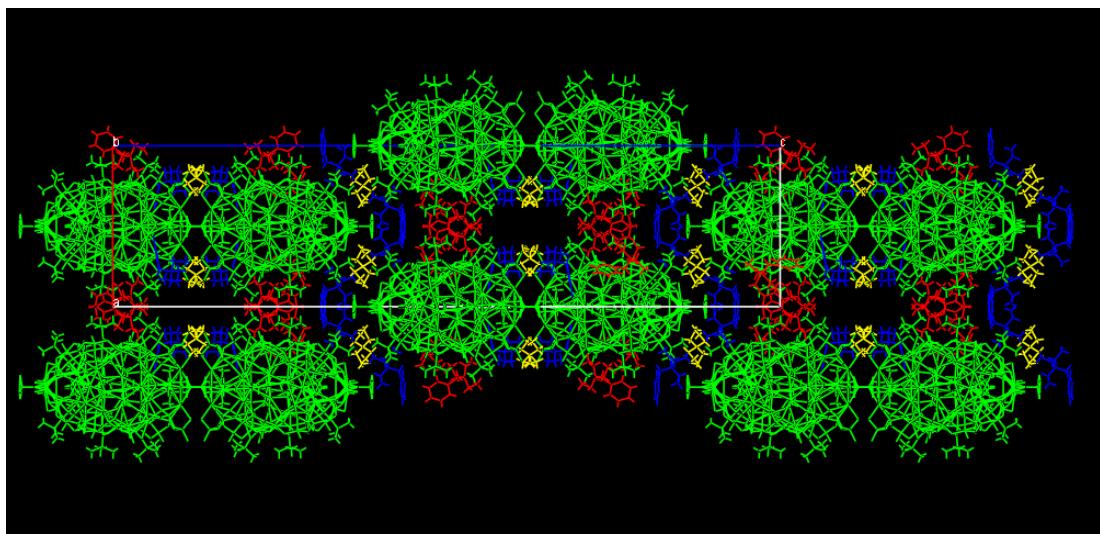

Figure S1. Packing diagram of complex **1** with eight BzEt_3N^+ and two Et_4N^+ counter cations, viewed along the *b*-axis. The $[(\text{V}_2\text{O}_7)_2@\text{Ag}_{44}(\text{C}\equiv\text{C}'\text{Bu})_{14}@(\text{V}_{32}\text{O}_{96})]^{10-}$ cluster is shown in green color, the Et_4N^+ cation in yellow, and the independent BzEt_3N^+ cations in red and blue.

2. TEM results for complex **1**.

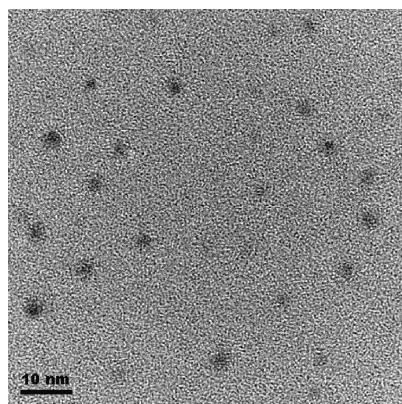

Figure S2. TEM image of complex **1**.

3. Cyclic voltammogram for **1**.

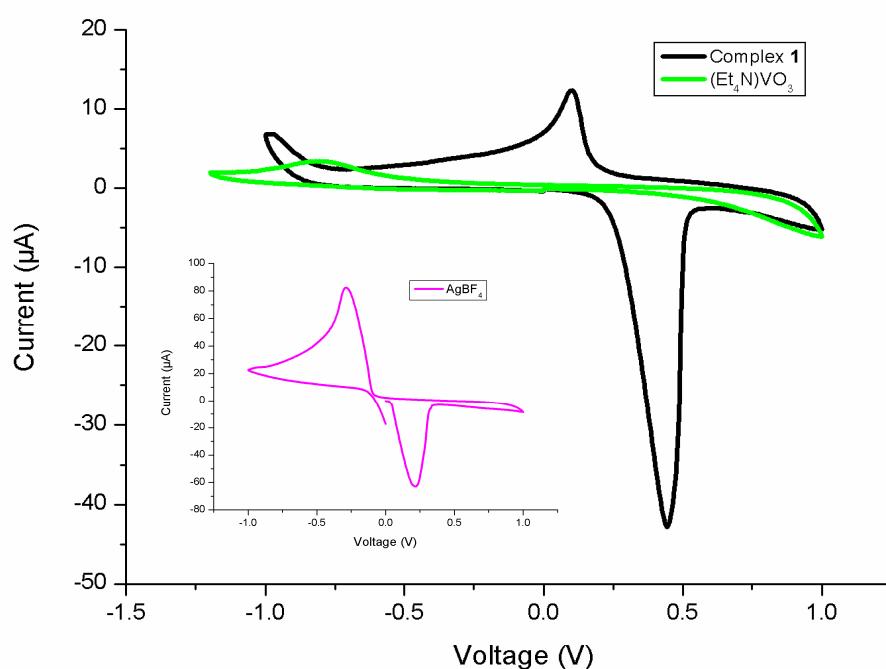

Figure S3. Cyclic voltammograms for complex **1**, $(\text{Et}_4\text{N})\text{VO}_3$ and AgBF_4 in DMF.
