Fig. S1 XRD diffraction data of SiPO$_1$-1 and SiPO$_1$-2.

X-Ray diffraction pattern were measured with a D5000 (Siemens) diffractometer using Cu-Kα radiation ($\lambda = 1.5406$ nm) and a D8 Discover (Bruker) diffractometer using Cu-Kα radiation ($\lambda = 1.5418$ nm). Because of a possible instability when exposed to air the samples were protected with foil.
