**Figure 1.** Overlaid  $^1\text{H}$ - $^{15}\text{N}$  HSQC spectra of GB1 (black contours) and 5-fluorotryptophan-GB1 (red contours). The samples were in 10 %  $\text{D}_2\text{O}$  at pH 6.0 and the spectra were acquired at 30 °C on a Varian 500 MHz spectrometer equipped with a HCN probe.
