Supplementary material, Borel et al.

Figure S1. Thermal ellipsoid drawings (50%) of the two coordination spheres in 1.

Comments on the crystal structure refinement: The thermal ellipsoids around C3 indicate disorder, but it was not possible to model this in a satisfactory way. As for the crucial N-H...O hydrogen bond, any such disorder has no effect and is thus not important for the overall structure.

Figure S2 TGA measurement of 1 (nitrogen atmosphere).
