Table of Contents

1. SEM images of TiO$_2$ nanorod arrays synthesized from aqueous solution (TTIP$_{aq}$).
2. SEM image of TiO$_2$ nanorod arrays synthesized from the solution with TTIP$_{aq}$:H$_2$O = 1:1.
3. SEM images of TiO$_2$ nanoribbon arrays synthesized from the solution with TTIP$_{aq}$:EG = 2:1.
4. SEM images of TiO$_2$ nanoribbon arrays synthesized from the solution with TTIP$_{aq}$:EG = 1:1.
5. SEM images of TiO$_2$ nanoribbon arrays synthesized from the solution with TTIP$_{aq}$:EG = 1:2.
6. SEM images of TiO$_2$ nanowire arrays synthesized from the solution with TTIP$_{aq}$:EG = 1:1 and 5 mmol urea.
7. SEM images of TiO$_2$ nanowire arrays synthesized from the solution with TTIP$_{aq}$:EG = 1:2 and 5 mmol urea.
8. XRD patterns of 1D TiO$_2$ nanostructures.
9. Cross-sectional SEM image of multilayer TiO$_2$ nanoribbon arrays after repeating synthesis 3 times (TTIP$_{aq}$:EG = 1:1).
10. Dye adsorption amount of 1D TiO$_2$ nanostructures.
Figure S1: SEM images of TiO$_2$ nanorod arrays synthesized from aqueous solution (TTIP$_{aq}$).
Figure S2: SEM image of oriented TiO$_2$ nanorod arrays synthesized from the solution with TTIP$_{aq}$:H$_2$O = 1:1.
Figure S3: (a) Low and (b) high magnification images of oriented 1D TiO$_2$ nanoribbon arrays synthesized from the solution with TTIP$_{aq}$:EG = 2:1.
Figure S4: (a) Low and (b) high magnification images of oriented 1D TiO$_2$ nanoribbon arrays synthesized from the solution with TTIP$_{aq}$:EG = 1:1.
Figure S5: (a) Low and (b) high magnification images of oriented 1D TiO$_2$ nanoribbon arrays synthesized from the solution with TTIP$_{aq}$:EG = 1:2.
**Figure S6**: (a) Low and (b) high magnification images of oriented 1D TiO$_2$ nanowire arrays synthesized from the solution with TTIP$_{aq}$:EG = 1:1 and 5 mmol urea.
Figure S7: (a) Low and (b) high magnification images of oriented 1D TiO$_2$ nanowire arrays synthesized from the solution with TTIP$_{aq}$:EG = 1:2 and 5 mmol urea.
Figure S8: XRD patterns of oriented 1D TiO₂ nanostructure arrays grown on FTO glass substrates.
**Figure S9**: Cross-sectional image of multilayer oriented TiO$_2$ nanoribbon arrays after repeating synthesis 3 times (TTIP$_{aq}$:EG = 1:1).
Figure S10: Dye adsorption amount of the photoanodes made from the oriented 1D TiO$_2$ nanostructure arrays.
