Figure S1 $^1$H NMR (CDCl$_3$ solution) of room temperature form (red) and high temperature form (blue) of BLN HCl. The solution NMR spectra confirm chemical integrity of the sample during the heating process; that there is no drug decomposition during heating.
Figure S2 Experimental (black) and calculated (red) powder X-ray diffraction pattern of (a) BLN HCl RT form and (b) BLN HCl monohydrate. The bulk material matches with the single crystalline phase.
