Table of Contents

Figure S1. PXRD patterns for 1-6. (a) simulated (black) and single-phase polycrystalline sample (red) of 1. (b) simulated (black) and single-phase polycrystalline sample (red) of 2. (c) simulated (black) and single-phase polycrystalline sample (red) of 3. (d) simulated (black) and single-phase polycrystalline sample (red) of 4. (e) simulated (black) and single-phase polycrystalline sample (red) of 5. (f) simulated (black) and single-phase polycrystalline sample (red) of 6.········································································S3

Figure S2. View of the 3D topological net of 2 looking along the a axis. The cyan and red spheres represent Zn centres and tpcb ligands, respectively.········································································S5

Figure S3. View of the 3D topological net of 3 looking along the a axis. The cyan and red spheres represent Zn centres and tpcb ligands, respectively.········································································S5

Figure S4. View of the 3D topological net of 4 looking along the a axis. The cyan and red spheres represent Zn centres and tpcb ligands, respectively.········································································S6
Figure S1. PXRD patterns for 1-6. (a) simulated (black) and single-phase polycrystalline sample
(red) of 1. (b) simulated (black) and single-phase polycrystalline sample (red) of 2. (c) simulated (black) and single-phase polycrystalline sample (red) of 3. (d) simulated (black) and single-phase polycrystalline sample (red) of 4. (e) simulated (black) and single-phase polycrystalline sample (red) of 5. (f) simulated (black) and single-phase polycrystalline sample (red) of 6.
**Figure S2.** View of the 3D topological net of 2 looking along the $a$ axis. The cyan and red spheres represent Zn centres and tpcb ligands, respectively.

**Figure S3.** View of the 3D topological net of 3 looking along the $a$ axis. The cyan and red spheres represent Zn centres and tpcb ligands, respectively.
**Figure S4.** View of the 3D topological net of 4 looking along the $a$ axis. The cyan and red spheres represent Zn centres and tpcb ligands, respectively.
