Layered titanosilicates for size- and pattern-controlled overgrowth of MFI zeolite

Stanislav Ferdov
Figure S1. Le Bail fit refinement of pure forms of MFI, JDF-L1 and AM-4.
Figure S2. Le Bail fit refinement of the MFI/JDF-L1 overgrowth.
Figure S3. Le Bail fit refinement of the MFI/AM-4 overgrowth.

Figure S4. Change of the lattice volume of MFI grown on JDF-L1. The circle shows the unit cell volume of the recovered sample at 30 °C.
Figure S5. Change of the lattice volume of MFI grown on AM-4. The circle shows the unit cell volume of the recovered sample at 30 °C.
