TABLE OF CONTENT

Illustration of the hydrogen bonding of 1-7 S1-S3

Hirshfeld surfaces of 1-5 S4-S9

The thermal ellipsoid plots of 1-5 at 50% probability level and additional packing plots S10-S8
**Figure S1.** The hydrogen bonding synthons of compound 1-4 and 6 are highlighted in red.

**Figure S2.** The hydrogen bonding synthon of dimeric units of compounds 5 (blue and black) is highlighted in red.
Figure S3. The hydrogen bonding synthon of dimeric units of compounds 7 (blue and black) is highlighted in red.
**Figure S4.** Hirshfeld surfaces of compound 1. The dotted line stands for the hydrogen bonding.

**Figure S4.** Hirshfeld surfaces of compound 2. The dotted line stands for the hydrogen bonding.

**Figure S5.** Hirshfeld surfaces of compound 3. The dotted line stands for the hydrogen bonding.
Figure S6. Hirshfeld surfaces of compound 4. The dotted line stands for the hydrogen bonding.

Figure S7. Hirshfeld surfaces of compound 5. The dotted line stands for the hydrogen bonding.
**Figure S8.** Hirshfeld surfaces of 6. The dotted line stands for the hydrogen bonding.

**Figure S9.** Hirshfeld surfaces of 7. The dotted line stands for the hydrogen bonding.
Figure S10. The thermal ellipsoid plot of 1 at 50% probability level at 293 K. The water molecule O8 is at (-1/2 + x, 3/2 - y, 1 - z) and water O7 is at (1+x, y, z).

Figure S11. Chains of compound 1.
Figure S12. Packing of compound 1.

Figure S13. The thermal ellipsoid plot of 2 at 50% probability level at 173 K. The water molecule OW1 is at equivalent position (1/2 + x, 3/2 - y, 1 - z)
Figure S14. Chains of compound 2.
Figure S15. Packing of compound 2.
Figure S16. The thermal ellipsoid plot of 3 at 50% probability level at 173 K. The water molecule OW1 is at (1-x, 1/2 + y, 1-z) and that OW2 is at (1-x, -1/2 + y, 2-z).
Figure S17. Packing of compound 3.
Figure S18. The thermal ellipsoid plot of 4 at 50% probability level at 173 K. OW2 is at (1-x, -1/2 + y, 1-z).

Figure S19. Packing of compound 4.
Figure S20. The thermal ellipsoid plot of 5 at 50% probability level at 293 K. Readers are reminded that we have a three-fold symmetry and that equivalent atoms are at (x,y,z), (1-x+y, 1-x, z) and (1-y, x-y, z).
Figure S21. The dimeric units of 5.
Figure S22. Packing of 5.
