Figure S1. SEM images of deposits formed by drop evaporation of Ag colloids on p-type Si substrate: (a) a general view of the deposits, (b) and (c) nanosheets, (d) cubes and irregular...
particles in the outmost evaporation ring of the deposits, (e) and (f) disk-like structures in the central area, (g) and (h) flower-like structures, and (i) a chain of flower-like structures.

**Figure S2.** SEM images of (a) deposits formed by drop evaporation of Ag colloids on a glass coverslip, and (b) irregular particles with higher magnification.

**Figure S3.** XRD patterns of the bare Si substrates.
