Supporting information

Supporting 1. FE-SEM images of (a) the P-I Si layer on the layer of FTO, (b) the PCBM/P-I Si stack on the layer of FTO, (c) the LiF/PCBM/P-I Si stack on the layer of FTO, and (d) the Al/LiF/PCBM/P-I Si stack on the layer of FTO.

Supporting 2. J-V characteristics of the hybrid thin-film solar cells for (a) various PCBM spin-coating conditions and (b) various thermal annealing conditions.

Supporting 3. J-V characteristics of the hybrid thin-film solar cells having different interlayer combinations.
