Figure S1. SAXS/WAXS profiles for FPILs with ethanol for a) TEABF, b) BABF, c) DEABF, d) EABF, e) EAOB and f) PyrrOB. The profiles have been offset in intensity. The neat FPILs which are crystalline, or partially crystalline, have been omitted.
Figure S2. SAXS/WAXS profiles for FPILs with butanol a) TEABF, b) BABF, c) DEABF, d) EABF, e) EAOF and f) PyrrOBF. The profiles have been offset in intensity. The neat FPILs which are crystalline, or partially crystalline, have been omitted.
Figure S3. SAXS/WAXS profiles for EAO with a) ethanol and b) butanol. The profiles have been offset in intensity.
