Stratification of lung adenocarcinoma patients for d-lemonime intervention based on the expression signature genes

Tengteng Zhu, †‡ Qiang Li, †‡ Limin Xu, ‡ Qi Zhang, ‡ Wenwen Lv, ‡ Herbert Yu, ‡ Tienan Feng, *‡, † and Biyun Qian*†.

A table of contents

Figure S1 Flow chart of construction and validation of d-limonene signature gene.

Figure S2 Comparison of FZD3, MATURIN, PRC1 mRNA and protein level. A: Comparison of A549 and H1975 cell experiment which were compared by t-test; B: Immunohistochemical staining results of urethane induced mice which were compared by t-test; C: Immunohistochemical staining and western blot results of xenograft mice which were compared by t-test.
