Additional Figures

Fig. S1 The color of the potassium iodide-starch test paper immersed in the used electrolyte after 20 minutes.
Fig. S2 SEM images of Cu and Cu$_2$O particles electrochemically deposited on PANI surfaces under various applied electric fields (2, 4, 6, 8, and 10 V). Cu and Cu$_2$O particles are prepared by using copper sulfate and copper acetate as copper precursor, respectively.

Fig. S3 SEM images of Cu$_2$O particles electrochemically deposited on ITO surfaces from Cu(Ac)$_2$ concentration (a) 5 mM, (b) 10 mM, (c) 20 mM, (d) 50 mM, and (e) 100 mM. Applied voltage: 2 V, electrodeposition time: 10 min.
**Fig. S4** TEM images of Cu$_2$O particles deposited on PANI surface from 50 mM Cu(Ac)$_2$ at a reaction time of 2 s. Applied voltage: 6 V.
