Iron(II)-octacyanoniobate(IV) ferromagnet with $T_C$ 43 K

Dawid Pinkowicz, Robert Podgajny, Robert Pelka, Wojciech Nitek, Maria Bałanda, Magdalena Makarewicz, Mariusz Czapla, Jan Żukowski, Czesław Kapusta, Dariusz Zając, and Barbara Sieklucka

Electronic Supporting Information

Table of contents

Figure S1. Perspective view of the structure of 1 along $a$ and $b$ direction a) and along $c$ direction b). In pink- distorted octahedral coordination sphere of Fe$^{II}$, in gray- square-anitprismatic coordination sphere of Nb$^{IV}$.

Figure S2. IR spectrum of 1.

Figure S3. Resonance Raman spectrum of 1 obtained with use of 514 nm laser light at $T = 300$ K
