Electronic Supplementary Information (ESI)

Assembling CdS mesoporous nanosheets into 3D hierarchitectures for effectively photocatalytic performance

ESI Fig. S1  SEM images of the as-prepared CdS using NaOH solution to replace ammonia.
ESI Fig. S2 SEM images of the as-prepared CdS without adding soulcarboxymthyi chitosan.
ESI Fig. S3  SEM images of the as-prepared CdS using thioacetamide as S source.
