Fig 1. Location of Lake Geneva in Switzerland. Red square indicates the study area. High-resolution multibeam bathymetric map from 2008 (swiss coordinates - number of swiss grid are given in meters) modified from Sastre et al. (2010). Data courtesy of Institut F.-A. Forel, University of Geneva. Core locations of the cores from this study and core LP used for sedimentation rates estimation for cores #1 and #2.
**Fig 2.** Correlation between cores #4 and #5 with $^{137}$Cs activity profile from #5 (A) and cores #1, #2 and core LP which was also dated by $^{137}$Cs (B, c.f. Corella et al 2014).
