Electronic Supplementary Information (ESI)

Palladium-catalyzed decarboxylation of higher aliphatic esters: Towards a new protocol to the second generation biodiesel production

Junxing Han, Hui Sun, Yuqi Ding, Hui Lou* and Xiaoming Zheng

Table of contents

Characterization of freshly prepared 5%Pd/BaSO₄ .................................. Fig. SI1-SI3
Characterization of freshly prepared 5%Pd/MWCNTs. ......................... Fig. SI4-SI6
GC results of methyl stearate liquid products........................................ Fig. SI7
GC result of methyl palmitate liquid products........................................ Fig. SI8
GC result of methyl laurate liquid products.......................................... Fig. SI9
GC result of ethyl stearate liquid products........................................... Fig. SI10
GC result of ethyl octanoate liquid products........................................ Fig. SI11
GC result of methyl palmitate gas products........................................ Fig. SI12
GC-MS result of methyl palmitate gas products..................................... Fig. SI13
GC result of ethyl octanoate gas products............................................ Fig. SI14
GC-MS result of ethyl octanoate gas products....................................... Fig. SI15
TEM images of 5%Pd/BaSO₄: a) freshly prepared, b) used.................... Fig. SI16
**Fig. S11** XRD pattern of freshly prepared 5%Pd/BaSO$_4$

**Fig. S12** TEM image of freshly prepared 5%Pd/BaSO$_4$
Fig. S13 EDS pattern of freshly prepared 5%Pd/BaSO₄

Fig. S14 XRD pattern of freshly prepared 5%Pd/MWCNTs
**Fig. S15** TEM image of freshly prepared 5%Pd/MWCNTs

**Fig. S16** EDS pattern of freshly prepared 5%Pd/MWCNTs
Fig. S17 GC result of methyl stearate liquid products

Fig. S18 GC result of methyl palmitate liquid products
