

Supplementary information

SI-1:

Supplementary
information for

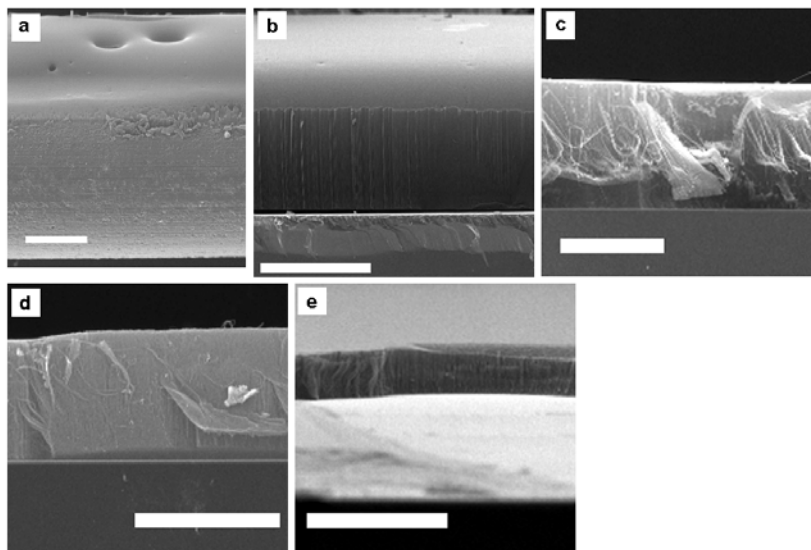

figure 3.

Figure 1: SEM micrographs of Height of CNT films grown for certain Hydrogen or water concentrations marked in figure 3. (Data bar for SEM micrographs a and b is 200 μ m and 100 μ m for c,d and e)

SI-2: Supplementary information showing SEM (a) and AFM (b) micrographs of Catalyst particles formed on Si wafer after heating up Al and Fe film on it.
