End-Functionalization of a Vinylidene Fluoride Oligomer in Coordination Nanochannels

Nobuhiro Yanai, Takashi Uemura, Noriyuki Uchida, Silvia Bracco, Angiolina Comotti, Piero Sozzani, Tetsuhiro Kodani, Meiten Koh, Takashi Kanemura, and Susumu Kitagawa

Figure S1. $^{19}$F NMR spectra of the isolated OVDF after reacting with (a) 1b and (b) 1c for 12 h in acetone-d$_6$. The peaks at asterisks are attributable to the defects of head-to-head VDF units.
