Supplementary Information
**Fig. S1** N2 adsorption–desorption isotherm and the corresponding pore size distribution inset of HMS, HMS@C18 and (c) IBU@HMS@C18.

**Fig. S2** Mean fluorescence intensity on FR+ and FR- cells with HAMAFA-b-DBAM-coated DOX@HMS@C18@SPIONPs in solution at different incubation times.

**Fig. S3** Photograph of the dispersion stability of nanocarrier in a serum-containing medium.
Fig. S4 The photographs of intracellular accumulation of SPIONPs (a) before and (b) after stained by Prussian Blue (took by Microscope ST-590UZ, Olympus, Japan.)
