Figure S1: Schematic depicting the fabrication procedure of the device. The images on the right depict the actual set-up at each step of fabrication. The electrodes have been ‘sketched’ onto the square pads at the ends of the paper channel.
Electronic Supplementary Information

Figure S2: Schematics representing the two different polarity configurations for the potential applied at the electrodes of the device (a) Left electrode at a higher potential, i.e. ‘L’ configuration (b) Right electrode at a higher potential, i.e. ‘R’ configuration
