

Microfluidic platform for chemoresistive testing of multicellular pleural cancer spheroids[†]

Supplementary Material

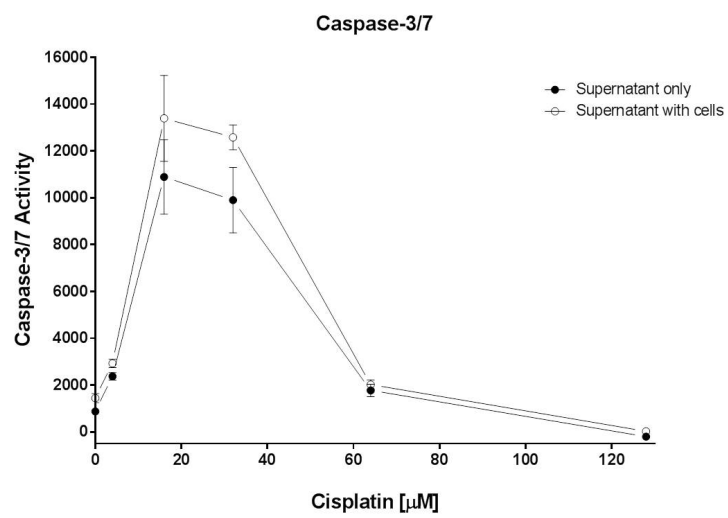

Fig. 1 S1: Caspase-3/7 activity in spheroids ($n=3$). Analysis were done either with only supernatant or with samples containing the spheroids. Data are means \pm SEM.

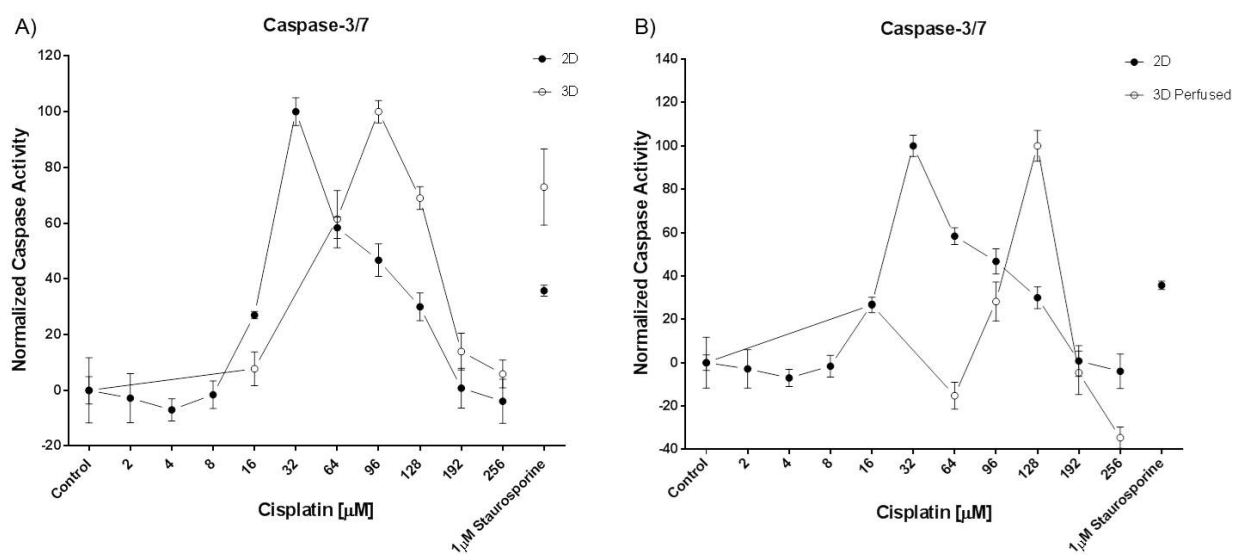

Fig. 2 S2: Caspase-3/7 activity comparison between 2D and 3D ($n \geq 3$)(A) as well as 2D and 3D Perfused ($n \geq 3$)(B). Data are means \pm SEM.
