

# New side-bridged bismacrocycles and cross-bridged macrotricycles.

## Syntheses and Cu(II) complexation study.

Nicolas Bernier, Mustapha Allali, Raphaël Tripier, Françoise Conan, Véronique Patinec, Stéphanie Dévelay, Michel Le Baccon and Henri Handel\*

Spectrophotometric titration curve for the addition of Cu(II) perchlorate hexahydrated to non-constrained macrotricycle (cyclen based macrotricycle with meta-xylene spacers)<sup>1</sup> as example for all this family of dimers.
