Supporting Information
Figure S1. Snapshots of the model of Pt (111)/O₂/H₂O taken at the end of the simulation time.
Figure S2. Snapshots of the model of Pt (100)/O₂/H₂O taken at the end of the simulation time.
Figure S3. Snapshots of the model of Pt (110)/O$_2$/H$_2$O taken at the end of the simulation time.
Figure S4. Distribution of the two configurations of adsorbed $\text{O}_2$ in models including 1200 water molecules.
