Fig. S1. Survey XPS spectra of (a) 5% and (b) 10% Cu-ZnO films.
Fig. S2. a) I-V plot of pristine and Cu-doped ZnO films in dark conditions. Inset shows a magnified view of the IV curve. b) Hydrogen gas sensing (500 ppm) of pristine and Cu-doped ZnO films at room temperature. c) UV sensing of pristine and Cu-doped ZnO films. d) White light sensing of pristine and 10% Cu-ZnO film.
Fig. S3. a) Cross-section SEM image of a bent sample of ZnO nanowires synthesized on PET substrate. b-d) SEM images of the region outlined by a red box at higher magnifications.
Fig. S4. a) I-V plot of 10% Cu-ZnO nanowires in a flat state and after 500 and 1000 times of bending.
   b) UV sensing of flat and bent 10% Cu-ZnO nanowires.
