Supplemental Figure 2

upper graph:
- Force (μN) vs. Time (sec)
- Force increases from 0 to 600 over time.
- A period of constant force from 600 to 400.
- A second period of constant force from 400 to 300.
- Further changes in force observable.

lower graph:
- Force vs. Time (sec)
- A repetitive wave pattern of force over time from 60 to 74 sec.
