Figures

Fig. S1 $^1$H NMR spectrum of ortho/cis monomer
Fig. S2 $^1$H NMR spectrum of ortho/trans monomer
Fig. S3 $^1$H NMR spectrum of meta/cis monomer
Fig. S4 $^1$H NMR spectrum of meta/trans monomer
Fig. S5 $^1$H NMR spectrum of para/cis monomer
Fig. S6 $^1$H NMR spectrum of para/trans monomer
Fig. S7 $^1$H NMR spectrum of ortho/cis polymer
Fig. S8 $^1$H NMR spectrum of ortho/trans polymer
Fig. S9 $^1$H NMR spectrum of meta/cis polymer
Fig. S10 $^1$H NMR spectrum of meta/trans polymer
Fig. S11 $^1$H NMR spectrum of para/cis polymer
Fig. S12 $^1$H NMR spectrum of para/trans polymer
Fig. S13 Minimum energy conformation of meta/cis polymer
Fig. S14 Minimum energy conformation of meta/trans polymer
Fig. S15 Minimum energy conformation of para/cis polymer
Fig. S16 Minimum energy conformation of para/trans polymer
Fig. S17 Visualised frontier orbitals of meta/cis polymer
Fig. S18 Visualised frontier orbitals of meta/trans polymer
Fig. S19. Visualised frontier orbitals of para/cis polymer
Fig. S20. Visualised frontier orbitals of para/trans polymer
Fig. S21. TGA of ortho/cis and ortho/trans polymers
Fig. S22. TGA of meta/cis and meta/trans polymers
Fig. S23. TGA of para/cis and para/trans polymers
Fig. S24. OFET characteristics of ortho/cis polymer
Fig. S25. OFET characteristics of ortho/trans polymer
Fig. S26. OFET characteristics of meta/cis polymer
Fig. S27. OFET characteristics of meta/trans polymer
Fig. S28. OFET characteristics of para/cis polymer
Fig. S29. OFET characteristics of para/trans polymer

Fig. S1 ¹H NMR spectrum of ortho/cis monomer (CDCl₃)
Fig. S2 $^1$H NMR spectrum of ortho/trans monomer (CDCl$_3$)

Fig. S3 $^1$H NMR spectrum of meta/cis monomer (CDCl$_3$)
Fig. S4 $^1$H NMR spectrum of meta/trans monomer (CDCl$_3$)

Fig. S5 $^1$H NMR spectrum of para/cis monomer (CDCl$_3$)
Fig. S6 $^1$H NMR spectrum of para/trans monomer (CDCl$_3$)

Fig. S7 $^1$H NMR spectrum of ortho/cis polymer (CDCl$_3$, 298K)
Fig. S8 $^1$H NMR spectrum of ortho/trans polymer (CDCl$_3$, 298K)

Fig. S9 $^1$H NMR spectrum of meta/cis polymer (CDCl$_3$, 298K)
Fig. S10 ¹H NMR spectrum of meta/trans polymer (CDCl₃, 298K)

Fig. S11 ¹H NMR spectrum of para/cis polymer (CDCl₃, 298K)
Fig. S12 $^1$H NMR spectrum of para/trans polymer (CDCl$_3$, 298K)

Fig. S13. Minimum energy conformation of meta/cis polymer. Side-on (top) and top-down (bottom) views shown
Fig S14. Minimum energy conformation of meta/trans polymer. Side-on (top) and top-down (bottom) views shown.

Fig S15. Minimum energy conformation of para/cis polymer. Side-on (top) and top-down (bottom) views shown.
**Fig S16.** Minimum energy conformation of *para/trans* polymer. Side-on (top) and top-down (bottom) views shown.

**Fig. S17.** Visualised frontier orbitals of *meta/cis* polymer. HOMO (left) and LUMO (right).

**Fig. S18.** Visualised frontier orbitals of *meta/trans* polymer. HOMO (left) and LUMO (right).
Fig. S19. Visualised frontier orbitals of para/cis polymer. HOMO (left) and LUMO (right)

Fig. S20. Visualised frontier orbitals of para/trans polymer. HOMO (left) and LUMO (right)

Fig. S21. TGA of ortho/cis (left) and ortho/trans (right) polymers

Fig. S22. TGA of meta/cis (left) and meta/trans (right) polymers
Fig. S23. TGA of para/cis (left) and para/trans (right) polymers

Fig. S24. Output (left) and transfer (right) characteristics of ortho/cis polymer

Fig. S25. Output (left) and transfer (right) characteristics of ortho/trans polymer
Fig. S26. Output (left) and transfer (right) characteristics of meta/cis polymer

Fig. S27. Output (left) and transfer (right) characteristics of meta/trans polymer

Fig. S28. Output (left) and transfer (right) characteristics of para/cis polymer
Fig. S29. Output (left) and transfer (right) characteristics of para/trans polymer
