Figure S 1. UV-Vis spectra and of as-prepared GO and chemically reduced GR. Inset: the digital image of the dispersions of GO (left) and GR (right).
Figure S 2. TEM images of single nanosheets of GO (A) and GR (B). The scale bar is 0.5 µm.

Figure S 3. TEM images of the nanocomposites of PPy/GO (A) and PPy/GR (B). The scale bar is 0.2 µm.
**Figure S 4.** $\text{N}_2$ adsorption/desorption isotherm of electrochemical synthesized PPy/GR composite. Inset: pore size distribution calculated by BJH method from the desorption branch.
