Synthesis of Ni-Mo and Co-Mo-Ni Nano-Sulfides and their Stable Catalysis on Complicated Full-Ranged Pyrolysis Gasoline Hydorefinery

Supporting online information

![Diagram](image)

**Fig. S1** Schematic diagram of the process for PGHr.
**Fig. S2** TEM image of the catalyst LY9802. The clusters of active components are obviously bigger than that of nanocatalysts and irregular morphology of substrates could not offer well penetrability.
