Supporting Information:

ZnO Nanopinecone Arrays with Enhanced Photocatalytic Performance in Sunlight

Yu-Cheng Chang*

Department of Materials Science and Engineering, Feng Chia University, Taichung, 40724, Taiwan

Figure S1. (a) Low and (b) high magnification SEM images of ball-like ZnO nanoplates grown on Si wafer with ZnO seeds layer.
**Figure S2.** Schematic diagram illustrates the processes and substrates to catalyze the degradation of phenol by sunlight.
