Figure S1. $^1$H NMR (300MHz, CDCl$_3$) spectra of PCL (top spectrum) and propargylated PCL (bottom spectrum).
**Figure S2.** SEC traces of unmodified PCL and propargylated PCL (PCL-yne).

**Figure S3.** Thermograms of networks in the glass transition region.
Figure S4. Non exhaustive selection of typical strain-stress curves obtained with PCL-yne and photo cross-linked networks.
