Fig. S1. (A) TP4T and (B) TP8T Creep experiments at 293 K for different concentrations as indicated; (C) TP4T and (D) TP8T Combined frequency sweeps and converted creep experiments at 293K at different concentrations as indicated.
Fig. S2. Plateau storage modulus ($G_0$) as a function of temperature for different concentrations of TR8T: 1.2 mM (▼), 0.9 mM (+), 0.6 mM (◊). Symbols correspond to experimental data and lines correspond to model calculations.
