Electronic Supplementary Information for
Sulfur-incorporated carbon quantum dots with a strong long-wavelength absorption band

Figure S1. Additional TEM images of a series of the S-CQDs: (a) bare, (b) S1, (c) S2, and (d) S3.
Figure S2. Additional low-magnification TEM images of a series of the S-CQDs: (a) S1, (b) S2, and (c) S3.
Figure S3. Time-resolved emission decay spectra (excitation wavelength = 460 nm) of a series of the S-CQDs: (a) bare, (b) S1, (c) S2, and (d) S3. The time interval between each emission spectrum is 1.5 ns.
Figure S4. Time-resolved emission decay spectra (excitation wavelength = 480 nm) of a series of the S-CQDs: (a) bare, (b) S1, (c) S2, and (d) S3. The time interval between each emission spectrum is 1.5 ns.
Figure S5. Time-resolved emission decay spectra (excitation wavelength = 520 nm) of a series of the S-CQDs: (a) bare, (b) S1, (c) S2, and (d) S3. The time interval between each emission spectrum is 1.5 ns.
