

国家纳米科学中心
National Center for Nanoscience and Technology

Programme Agenda

Nanoscale Horizons Symposium at ChinaNANO 2017

29 August 2017

Room 201A

Beijing International Convention Center (BICC), China

Time	Event	Session Chair
13:30	Professor Chunli Bai <i>President of the Chinese Academy of Sciences, China</i> Introduction and welcome	Professor Xingyu Jiang, <i>National Center for Nanoscience and Technology, China</i>
14:00	Professor Yamuna Krishnan <i>University of Chicago, USA</i> DNA Nanotechnology reveals a new role for chloride in biology	Professor Francesco Stellacci <i>École Polytechnique Fédérale de Lausanne, Switzerland</i>
14:30	Professor Federico Rosei <i>INRS Center for Energy, Materials and Telecommunications, Canada</i> New reactions in surface chemistry	
15:00	Professor Xiaodong Chen <i>Nanyang Technological University, Singapore</i> Rational design of structural nanomaterials for functional flexible devices	
15:30	Coffee break	
15:45	Professor Francesco Stellacci <i>École Polytechnique Fédérale de Lausanne, Switzerland</i> The importance of structure in wetting at the molecular scale	Professor Xiaodong Chen <i>Nanyang Technological University, Singapore</i>
16:15	Professor Jianfang Wang <i>The Chinese University of Hong Kong, China</i> Plasmonic Driving of Chemical Reactions	
16:45	Professor Katharina Landfester <i>Max Planck Institute for Polymer Research, Germany</i> Polymeric nanocapsules: encapsulation, transport, targeting, and release	
17:15	Close
