

# Applied Industrial Synthetic Biology in Europe

## – Status Quo and Perspectives

Biofine 2009 - 16 and 17 April, Freiburg, Germany

### Sessions:

- Basic Applied Research in Synthetic Biology
- Organizational & Political Pre-requisites
- Enabling Technologies
- Industrial Panel

### Sponsored by:

- ATG:biosynthetics GmbH
- febit synbio GmbH
- GENEART AG
- Sloning Biotech GmbH

### Keynotes by:

- Chris Paddon (Amyris Inc. USA)
- Andreas Plückthun (Universität Zürich)

### Other Speakers:

- Wilfried Weber (ETH Zürich)
- Nediljko Budisa (TU Munich)
- Michael Reth (bioss Freiburg)
- Imre Berger (EMBL- Grenoble)
- and other high level speakers

# SB.info

### Conference High Lights:

- Advances in Synthetic Biology
- Organizational & Political Prerequisites
- Enabling Technologies
- Industrial Panel

### Aims of the Conference:

The conference will focus on recent advances in the applicability of Synthetic Biology technologies for the generation of advanced applications in the field of Biopharma and Molecular Medicine. Front edge enabling technologies with high impact on the field accelerating development of applications are considered as well as the final bioproduction technologies. Therefore, the conference is covering the whole range of developmental stages from research to the final bio-production strategies.
