A Celebration of Organic Chemistry 2018

Monday 24 – Tuesday 25 September 2018, UCB, Braine, Belgium

Synopsis

On Monday 24 and Tuesday 25 September 2018, influential researchers from across Europe and the US will gather in Belgium to present a series of lectures on the latest developments in the field of organic chemistry. This event, jointly organised by SCI's Fine Chemicals Group and UCB, will celebrate the best of modern organic chemistry and will focus on the development of new methodology which enable the synthesis of complex molecules. The meeting will also provide a platform for early career researchers to share their vision for the future of organic chemistry.

Attendees

Bringing together leading scientists from the organic chemistry community, this meeting will be of interest to those in academia and industry who are interested in developing and applying modern organic chemistry techniques to their research.

SCI members who attend the conference are able to claim CPD points
