

Keith Fagnou Organic chemistry Symposium (KFOS)

University of Ottawa, May 5-7, 2010

CONCEPT

We welcome your interest and invite you to participate in the Keith Fagnou Organic chemistry Symposium (KFOS), to be held May 5-7, 2010, at the University of Ottawa.

Inspired and organized by the Fagnou Group, KFOS is a celebration of Keith's achievements and the advances in the organic chemistry community at large.

Our goal is to create such an opportunity to allow for high calibre research to be presented and shared among students and researchers alike who knew Keith as a mentor, a colleague, a researcher, and as a friend. Keith always put great value in the sharing of research among members of the chemical community and it is in this spirit that the "Fagnou Factory" hosts KFOS.

SPEAKERS

Louis-Charles Campeau

Former group member

Dennis Hall

University of Alberta

Gregory Hughes

Merck Rahway

Michael Kerr

University of Western Ontario

Mark Lautens

University of Toronto

Tom Rovis

Colorado State University

Melanie Sanford

University of Michigan

Brian Stoltz

California Institute of Technology

Mark Taylor

University of Toronto

REGISTRATION DEADLINES

Symposium/Banquet: April 18, 2010

Poster Abstracts: April 11, 2010
