

3 June 2015, Tokyo, Japan

Organic Chemistry Symposium

Royal Society of Chemistry Roadshow

Programme

10:00 - 10:10	Opening remarks by Daping Zhang (Royal Society of Chemistry)
10:10 - 12:10	Chair: Kathleen Too
10:10 - 10:50	Collaborative Approach to C - H Functionalization Huw Davies (Emory University)
10:50 - 11:30	Lessons from Total Synthesis of Hybrid Natural Products Keisuke Suzuki (Tokyo Institute of Technology)
11:30 - 12:10	Flash presentations C(sp ³) - H Bond Functionalization Mediated by Hydride Shift/Cyclization System Keiji Mori (Tokyo University of Agriculture and Technology) Selective Hydrogenolysis of C - O Single Bonds by Hydroxycyclopentadienyl Iridium Complexes Shuhei Kusumoto (University of Tokyo)
12:10 - 13:10	Lunch

13:10 - 15:10	Chair: Jeanne Andres
13:10 - 13:50	Synthesis of Natural Products Containing Benzannulated Spiroketal Margaret Brimble (University of Auckland)
13:50 - 14:30	Difunctionalization - type Trifluoromethylation Reactions of Olefins Mikiko Sodeoka (RIKEN)
14:30 - 15:10	Flash presentations Synthetic Study of Resiniferatoxin Shunichiro Kato (University of Tokyo) The Mode of Action of an Antitumor Macrolide Aplyronine A, Which Induces a New Protein - Protein Interaction Yuichiro Hirayama (University of Shizuoka)
15:10 - 15:30	Coffee break
15:30 - 17:30	Chair: Masayuki Inoue
15:30 - 16:10	Seeking Opportunities for C - H Functionalization Methods in Organic Synthesis Erik Sorensen (Princeton University)
16:10 - 16:50	A RaPID way for the discovery of pseudo - natural products and its innovation Hiroaki Suga (University Tokyo)
16:50 - 17:30	Publishing your research in high impact journals Richard Kelly & Hiromitsu Urakami
17:30	Closing remarks Masayuki Inoue (University of Tokyo)
