

**XIX EuCOMC**  
**EuCheMS Conference**  
**on Organometallic Chemistry**

To: President  
Chemical Society of all Countries  
affiliated with EuCheMC

Toulouse, November 23, 2010

Dear Mr. President,

The XIX EuCheMS Conference on Organometallic Chemistry (XIX EuCOMC) will be held in Toulouse, France, in the period 3-7 July 2011.

The EuCOMC is held every 2 years and has a reputation for excellent scientific presentation and discussion. Similar in scope to the international series ICOMC, it is attended by the leading scientists in the field of Organometallic Chemistry from all member countries of EuCheMS but also attracts numerous delegates from all over the World. Past conferences of this series have counted 200-400 delegates, depending on the location. We anticipate that the Toulouse conference will end up in the upper side of this range. We would like to draw your attention to the conference website, <http://www.eucomc2011.org>. It is already operational and will become an increasingly useful resource as the conference approaches.

We would like to encourage the Chemical Society from your country to actively participate in these events, thus contributing to its success. We envisage two possible actions for you to participate to the success of the conference, as summarized here:

1. by announcing the conference in the web page of the chemical society of your country and on its scientific journal;
2. by financially supporting students and young researchers from your country to attend the meeting.

In all cases, your Chemical Society logo will be featured on the promotional material (circulars, book of abstract, ...) of the conference. Thank you in this case to return as early as possible a good graphical quality logo.

We look forward to hearing from you.

Yours sincerely,

Philippe KALCK and Rinaldo POLI
