Abstracts

The following section of the book includes all the abstracts for presentation at 6-ISMSC.

Plenary abstracts are listed first, followed by keynote abstracts, contributed oral abstracts and poster abstracts. Abstracts are labelled with the following codes:

Plen	Plenary
K	Keynote
O	Contributed oral
P	Poster
FP	Flash poster presentation

The poster abstract section includes abstracts with an 'FP' code. Authors whose abstracts have been allocated an 'FP' code will give a flash poster presentation – a brief oral preview of their work in the lecture sessions during the day, followed by presentation of their poster during the evening poster sessions.

An index of presenting authors is provided at the back of this book.
