

PET: Technology and Application – March 2016

Feedback from delegates attending the March 2016 course:

- The course provides a good insight into the theory and applications of PET. The style of all lecturers makes it a very accessible course, even for those with a different background
- Excellent course, very well structured. All the topics were relevant and it was quite easy to understand the lectures and topics even if it wasn't our field of expertise. The workshops were very interesting and helpful.
- Thorough interdisciplinary introduction to PET and workshops allow you to delve into your interests and informal chats with sponsor/speaker experts
- The course has managed to maintain a balance in multi-disciplinary diversification. I'm impressed.
- Rather excellent, I recommend. Really nice speakers during the three-day course.
- It is a very good course that covers various aspects of PET imaging. The lecturers are all experts and the quality of the material is really good.
- Very useful for researchers that will or are using PET
- Amazing approach and very well thought out. These courses of course are very useful for scientists. Imparting knowledge is what is very much needed in nuclear applications.
- The course can give you a great overview on all aspects of PET imaging - from tracer development to clinical use. For more specific questions the specialists are very helpful in answering them during the breaks.
- I really enjoyed the entire course. I think I have learned a lot and at the same time I have made a lot of friends. Furthermore, I would like to add that the workshops were really useful, I think I learned a lot from them
- I enjoyed all of the presentation and I was impressed by the quality of the handouts for lectures and workshops
- Having presenters around to chat to after their presentation was incredibly useful and made for some fascinating Q&A
- Impressed by standard and organisation of the course - get in detail perspectives from the various aspects of PET in a holistic way
- The course structure is great. Really nice social activities
- Congratulations on the course, it has been a great experience.
- Brilliant, well done to everyone on organising a thorough programme with good speakers and a friendly atmosphere for meeting others active in the field. Tony is a great guy. Enjoyed!
- It was a lovely experience and I am hopefully a better chemist for coming.
