Poster Session

Networking

Outline for the day

Materials in Consumer Goods and Healthcare is being organised to catalyse Open Innovation in the UK's Consumer Goods and Healthcare sectors, bringing together companies, from large multi-nationals to SMEs, and other technology developers and users. The morning session will provide an opportunity for four global leaders in consumer goods and healthcare to share their requirements, for materials-related technologies with speakers from 3M, GSK Consumer Healthcare, Boots Technical Centre and Reckitt Benckiser. They will share with the audience their needs and wants from external parties.

The afternoon session will be dedicated to networking. All participants are strongly encouraged to showcase their innovation needs and/or relevant capabilities through a poster or exhibit.

Added value for delegates

A directory of the collaboration offers and needs of the organisations attending the event will be made available to participants. Representatives from the Innovation Advisory Service in the South East, Materials KTN and Chemicals KTN will be on hand to provide advice and support with all aspects of open innovation in this field.

Who should attend

This event is targeted at CEOs, R&D, Innovation and Business Development Managers within companies engaged in developing and supplying materials-related technologies and those tasked with identifying new business opportunities.
