

What is Chemical Process Development?

Prof. John Blacker

Tuesday 10th March 2015

17:00 – 18:00

**Department of Chemistry, Durham
University**

Room CG91

Prof. John Blacker is Director of the Institute of Process Research and Development at the University of Leeds. The Institute was established in 2008 to bring together process chemists and chemical engineers to develop technologies to solve problems and improve processes in product manufacture. The Blacker group is interested in using catalytic processes to manufacture complex organic chemicals in a sustainable and economic way, scaling-up using batch or novel flow chemistry techniques.

A Durham University Chemical Society and RSC Guest Lecture.
Department of Chemistry, Durham University, South Road, Durham, DH1 3LE
All Welcome. Please contact Durham University Chemical Society to register your attendance and for more information. E-mail: chemical.society@durham.ac.uk
