

8th Biannual International Conference on “Frontiers in Chemical Sciences” Cairo, Egypt March 2-4, 2020

Invitation

You are cordially invited to join us to the 8th Biannual International Conference to be held in Cairo, Egypt from March 2-4, 2019. The conference will be hosted by Department of Chemistry, Faculty of Science–Cairo University.

Cairo is a metropolitan city located at the heart of Egypt and adjacent to the city of Giza; both cities are known for rich historical sites with sightseeing dated back from Pharos, Roman, Coptic, Islamic and Modern eras. With the Nile streaming through the heart of the city of Cairo, different activities with multicultural nature and warm hospitality attract visitors from all over the world.

During the month of March, the climate is fairly sunny during the day with dry and pleasant warm nights.

Scientific Scope

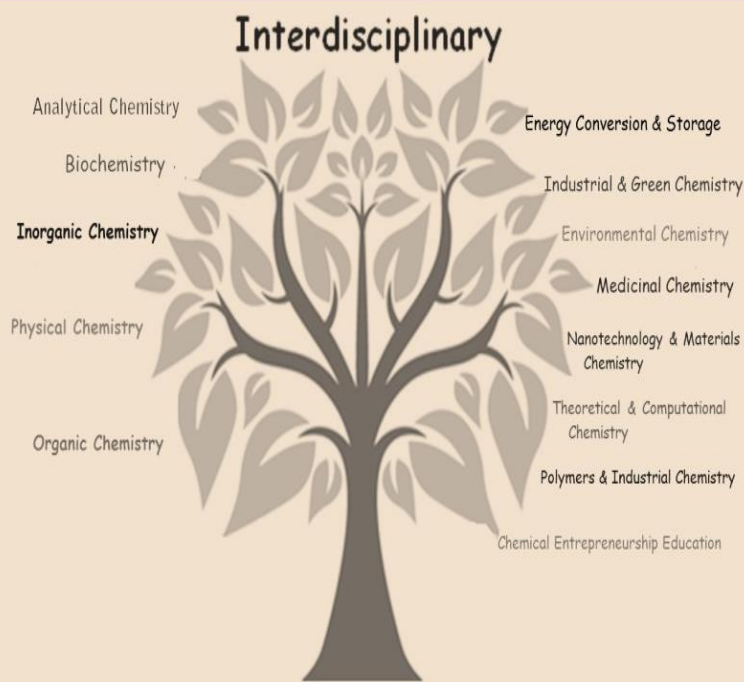

General Sessions will cover the broad aspects of chemistry (Analytical; Bio-; Inorganic; Physical and Organic Chemistry). Special sessions will be held to cover inter-, multi- and cross-disciplinary topics. Egypt is progressing aggressively in an ambitious plan to realize *Sustainable Development Strategy by 2030*. Chemistry with its centralized nature among different inter-related disciplines constitutes a spearhead for reaching this goal. Scientific presentations and discussions are planned to target innovations serving sustainable development in energy, medicine, food supply, water/air quality etc.

General Sessions

- Analytical Chemistry
- Biochemistry
- Inorganic Chemistry
- Physical Chemistry
- Organic Chemistry

Special Sessions

- ❖ Energy Conversion & Storage
- ❖ Industrial & Green Chemistry
- ❖ Environmental Chemistry
- ❖ Medicinal Chemistry
- ❖ Nanotechnology & Materials Chemistry
- ❖ Theoretical and Computational Chemistry
- ❖ Polymers and Industrial Chemistry
- ❖ Chemical Entrepreneurship Education

“Frontiers in Chemical Sciences”
