

# FP7 NMP Funding Information Day

## Nanosciences, Nanotechnology, Materials and New Production Technologies theme (NMP)

**Date & Time:** 7th May 2010 — 10.30-14.30

**Venue:** Royal Society of Chemistry, Burlington House, London

Innovation is often only possible (or at least made easier) by collaborating with partners having the appropriate skills, expertise and resources. The Framework Programme 7 offers the facility to engage in collaborative research and receive up to 75% funding from the European Commission.

This FREE half-day event delivered by Chemistry Innovation KTN, in partnership with FP7UK—The National Contact Point, Enterprise Europe Network London and SusChem UK will provide:

- an **overview of the upcoming 5th NMP call** and advanced notification of the call contents
- an opportunity to **meet the regional and national support teams**
- an opportunity to **network with potential partners** and experienced FP7 participants.

NMP is a 3.5b Euro programme that is broad-based and relevant to all key industrial and technology sectors in the UK. The goals of the NMP Programme cover 4 areas:

- Increase the take-up of knowledge generated in **Nanotechnology** for all industrial sectors.
- Generate new **Materials** knowledge to enable new industrial products and processes to be made, exploiting the potential of interdisciplinary approaches in materials research.
- Create continuously innovating **Production** capabilities to achieve leadership in industrial products and processes.
- Promote deployment and **integration** of new industrial applications that accelerates the rate of industrial transformation and enhances European technological competitiveness.

This call will also include Public-Private Partnership (PPP) calls for;

- Factories of the future
- Green cars
- Energy efficient buildings

### Programme

10:30	Registration
11:00	Welcome <i>Chemistry Innovation</i>
11:10	NMP Call contents 2011 <i>Alistair McGibbon — National Contact Point</i>
11:45	EEN Assistance <i>Chris Farmaces — Enterprise Europe Network</i>
12:00	Refreshments
12:15	How to write a good proposal <i>Alistair McGibbon — National Contact Point</i>
13:00	How to gain support and the role of KTN's <i>Chemistry Innovation</i>
13:15	Lunch & Networking
14:30	Close

**To register your interest in the event contact:**
