

Humber Chemical Focus & World Trade Centre

Chemicals on the Move 4

“Future Supply Chain & Distribution Dynamics”

Thursday 31st January 2008

@ The Logistics Institute at the University of Hull

Through the partnership network of Humber Chemical Focus and the region's new World Trade Centre in Hull we are delighted to draw your attention to the above event.

The chemical distribution sector is a vital part of the Euro 60 billion chemical sector in the UK and a key link between the industrial consumer and the supply chain. Developments in regulation (REACH), feedstock sourcing, transportation routes, and globalization are all contributing to the changing dynamics of the chemical supply chain. You are invited to attend this forth event in the Humber's 'Chemical on the Move' series to hear from a range of business leaders and regional speakers on the development in this key sector and regional implications.
